

Get the maximum cooling capacity of your portable AC!

Avoid complicated wall openings and keep maximum cooling capacity indoors. With Wood's Window Sealing Kit you avoid hot air coming back into the room, which significantly affects cooling capacity and energy balance. Also prevents dust, dirt and insects from entering the room with Wood's easily Sealing Kit.

Wood's Window Sealing Kit

The window cover Wood's Window Sealing Kit can be installed between a window and the frame with very little effort. The flexible adjustable zip opening makes it possible to place the sealing for all types of windows. After installation and when you want to leave the building, windows can be closed without difficulty.

This technology makes the Window Sealing kit seal versatile: each of the openings can be precisely matched to the hose diameter and nozzle size thanks to the zipper. In this way you can prevent the warm outdoor air from entering the room, which reduces power consumption. In addition, you can reliably keep dirt and insects away!

Wood's Window Sealing Kit

Works on all portable AC models
